

How to choose the size of your ring ??

Choosing the size of your ring is knowing the size of your finger.

To do this you have two ways to determine your finger size.

1- 1. Determine your finger size using a print ring sizer.

- Print the digital ring sizer available to you on this page, being careful to print it at actual size by checking the scale size of your printer.
- Find a ring that is worn on the same finger as the ring you want to acquire.
- Place the ring on the different circles that you have previously printed in order to find the one corresponding to your ring.
- It is necessary that the inside diameter of the ring corresponds to the outside diameter of the circle while showing the line of the circle in order not to choose a too small size ring.
- The corresponding circle will determine the correct size of the ring.

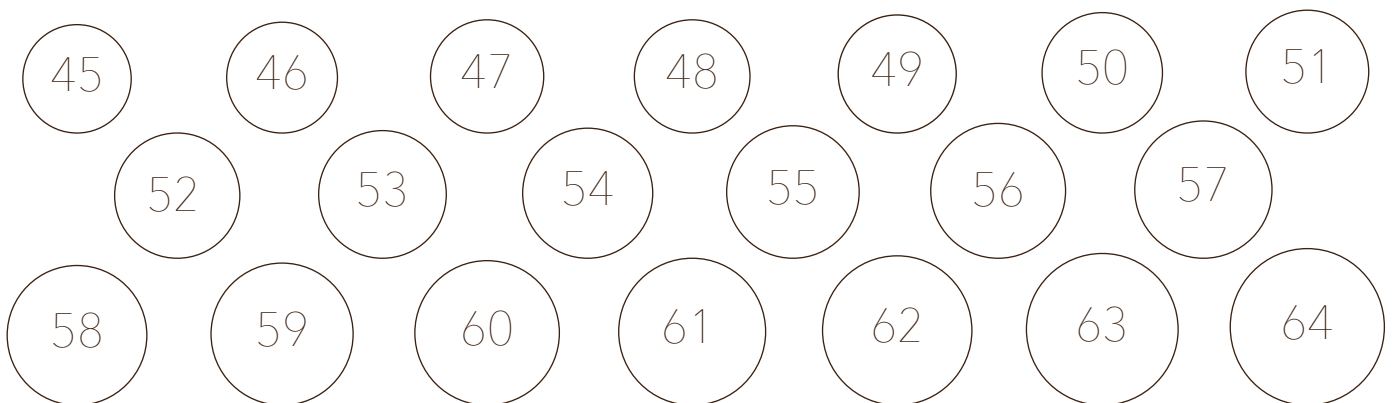

2. Know your finger size thanks to a ring sizer and a triboulet.

- By going to jeweler, you can ask to know your finger size. He can give you the size of your finger using a ring sizer.
- You can also bring a ring that you know is the right size for your finger and using the triboulet take the size of the ring.

The important things to know.

- It is essential to take into account that your hands, depending on the temperature or the time of day, may tend to swell.
- Our two hands are not the same, one tends to be stronger than the other.
- The width of the ring body and its composition may influence the choice of the ring size.

Indeed ; you have to add an additional size when choosing a thick ring or one formed of several rings, and remove one if your ring is very thin.
